

Living Beings Manifesto

Motto

PEACE AND LIVE

We are no longer like the dinosaurs
which could only go extinct
with the next meteorite to strike Earth,
or with the Earth and Sun inflation...

www.peacenlive.com

28/08/0057 Universal Terrestrial calendar
(16/02/2026 Gregorian calendar)

The EXISTENCE
of NO living being
is superior
to the one of another.

PILARS OF THE KNOWN WORLD

around 0057 U. T. cal. (2026 Gregorian cal.)

For the Universe composed of
MATTER and ENERGY in SPACE-TIME,

nothing is lost, nothing is created, everything is transformed
(1st principle of thermodynamics)

spontaneously tending towards an equilibrium
(2nd principle of thermodynamics),

oppose to it,
by building in matter
and putting it into motion,

GRAVITATION

...and the LIVING

LIVING - EQUALITY (TO ACT/TOHAVE) - PERENNIALITY

- Known world:
 - Conservation (axiom: 1st thermodynamics principle): Nothing is lost / Nothing is created / Everything gets transformed
 - Known Universe: TIME / SPACE (emptiness) / MATTER
 - MATTER: Body / Interactions (defined with the nature of the body) / Movement (ENERGY)
 - ENERGY: Still (potential) / Movement / Interact-Energy transfer between bodies
 - Transformation (2nd thermodynamics principle): Difference of energies / Transition / Equilibrium of energies
 - Interactions: Quantum (defined with the elementary particles of MATTER) / Gravitation (SPACE-TIME) / LIVING
 - Living being: Protect / Feed / Reproduce (to live one's sexual character)
- Living Beings:
 - Protect: Prey (the living is food for the living) / Innate Capacities / Coevolution
 - Feed: Autotroph / Heterotroph (predator) / Coevolution
 - Reproduce: Mitosis / Meiosis / Fertilization-Coevolution (entomogamy,...)
 - Recognition: Biological / Culture / Identity
 - Living relations: Family-Territory / Friends-Support / Cohabitants
 - Feeling: Love / Friendship / Neutral
 - Trust: Strong / Confident / Fascinated-Frightened
 - Point of view: Me / My reality / Universal
 - Language : Intimate / Familiar / Neutral
 - Intellectual capacity: Description / Projection-Anticipation / Fantastic-Poetry
 - Technical capacities: Describe / Build / Anticipate-Imagine
 - Pragmatism: Useful / Pleasure / Dream (Transcendence)
 - Spirituality: Idealism (intimate-religions) / Determinism (known physics) / Emptiness-chaos (absence of coherence)
 - Vital pulse (heart resonance): Power (preserve what is acquired) / Justice (absolute equity) / Hope (to build a perennial path)
- Cohabitation:
 - Culture : Transmitted Capacities / Rules TO ACT - TO HAVE / World representation (values, fears, mystery, beliefs)
 - Organization : TO KNOW (Finite biosphere) / TO ACT / TO HAVE
 - Finite biosphere : Habitable "rock" (Planet, space base) / Ground-Sea-Sky (solid, liquid, gaz)/ Space
 - TO ACT: Practice / Make / Transmit-Research (Go Beyond)
 - TO HAVE: Needs / Value / Respect
 - Ownership: Private (exclusive use) / Public (shared, regulated use) / Virgin (to no one)
 - Requirements : Safety / Success / Glory
 - Responsibilities: Functional-Basic / Duty / Initiative
 - Priorities: Our nature (living beings) / Our tools / Our future

For life

Living, our nature, identical.

Lean on what is fixed and solid inside your home,
to take the time to digest, to describe the world in family,
and to practice in order to be ready for action.

Equal despite our differences, our cultures shaped in a context.

Share with your friends and work to understand to grow up,
in order to build with trust the life journey,
living movements at the interface of the lands, the seas and the sky.

Perenniality, partners, life won't stop.

Meet the stranger to push our limits,
understand the unknown, fascinating and scaring,
to project outside, through space emptiness,
the new life adapted to its new environment.

A falling tree makes more noise than the growing forest,
this dead tree becoming itself a new oasis of life...

Come out of your shell

All along the river
Sundry Rhetorics flow.
Was it a grace prayer,
Or so erotic awe?

"I think of lots of things
To help the planet...";
A caring hand that rests,
A fresh air quivering,

hold this lyrical flight;
"... required." said the child,
Full of life as they bounce,

Do they walk through their bounds.
Further up on the edge,
Does the Adventure wait ?

Litany against the fear of the Bene Gesserit

Frank Herbert, Dune, 1965

« I must not fear.

Fear is the mind-killer.

Fear is the little-death that brings total obliteration.

I will face my fear.

I will permit it to pass over me and through me.

And when it has gone past, I will turn the inner eye to see its path.

Where the fear has gone there will be nothing.

Only I will remain. »

Resilience

*(Example for rewriting the French national anthem - *la Marseillaise*,
to be sung to the same tune)*

Come on all children of Life,
Each day's a glory to celebrate!
Let's stand tall in the face of tyrannies
Always proud to get up again,
Peace is the living victory.
Can you hear in the countryside
the rustle of life that frolics ?
It flourishes even in our steps,
in cities, and now in space!

Life won't stop!
Our hearts in unison,
Let's sing, let's dance!
Facing the hardest,
Life won't stop!

I am...

I am a dynamic process of building and animating matter,
which, like a river, continually renews itself by digesting and integrating its environment,
and whose source principle of the Universe is a mystery to the human species.

Child of a continuous chain of living beings from primordial cells,
I am more than similar in nature to all living beings, but of the same family.

I myself am a potential starting point for the life of tomorrow,
my life capable of merging with the one of another to give birth to a new living being,
whom I would then welcome into a protective home
and to I would transmit the state of my knowledge.

Faced with adversity, I allow the essential power
of my emotions to emerge in the moment to protect me.
Once the moment of aggression has passed, I ask for help
so that justice may be served, to heal my wounds and to take the necessary step back
so that the awakened power of protection... does not transform into destruction.

When I am lost, I dare to use the tools I have inherited
to invent new ones and build my own path,
sharing what I have learned without imposing it on others.
When my final hours come, I will hand over to this original principle
so that it may transform my life in its new state.

I am, therefore I can think... but I can also not do it.
I am my body, my interactions, my movement.

I am living.

If birds have wings obviously to fly,
the intellectual capacity that life built up,
that human beings did not choose to have,
that would be there
whatever our organization is
(communist, capitalist, anarchic,...),
whatever our beliefs or religions are,
opens amazingly the opportunity for life
not to die with a space rock flying by and hitting the earth,
nor with its earth and sun dispositions...

We are just lucky to have "awakened to intelligence",
to have reached this technological level
without any catastrophic planetary or space event
interrupting our development,
or even permanently wiping out the life started on Earth,
to be today in a very calm spatial context,
and that we have close to a billion years before the end of our star...

If the principle behind our ability to exist remains a mystery,
it is nonetheless true,
in view of the three billion years of life's existence on Earth,
that the most probable hypothesis is that...

Life won't stop
